## **Workhorse Group Reports Second Quarter 2019 Results**

CINCINNATI, August 6, 2019 – [Workhorse Group Inc.](#) (NASDAQ: [WKHS](#)) (“Workhorse” or “the Company”), an American technology company focused on providing sustainable and cost-effective electric-mobility solutions to the transportation sector, today reported financial results for the second quarter ended June 30, 2019.

### **Second Quarter and Recent Operational Highlights**

- **June 2019:** Secured \$25 million in financing from a private group of institutional investors, the proceeds of which will be used for general working capital and research and development, allowing the company to focus on finalizing the R&D associated with the N-GEN followed by production of its existing contracted backlog.
- **May 2019:** Announced discussions with General Motors (GM) and Lordstown Motors Corp. (LMC), an affiliated, newly formed entity, to purchase GM’s Lordstown Complex in Lordstown, Ohio.
- **April 2019:** Entered an alliance with Duke Energy. The alliance will help reduce the overall costs of fleet electrification and accelerate the adoption of electric vehicles into commercial and government fleets. Through the alliance, Duke plans to offer eFleet solutions to existing and future Workhorse customers. Potential offerings include single-point management and financing of behind-the-meter infrastructure, which is necessary to support depot-wide electrification; vehicle financing/battery management programs; and solar and energy storage and other distributed energy resources.
- **April 2019:** Entered into subscription agreement with existing Workhorse investors to sell 3,957,432 shares of common stock resulting in net proceeds of \$2.9 million that will be used for working capital and general corporate purposes.
- **April 2019:** Partnered with Prefix Corporation to finalize the design, development and production of the N-GEN series all-electric delivery van, incorporating features such as light-weighting the vehicle to improve mileage, performance, driver safety and reducing the burden of infrastructure requirements.
- **March 2019:** Continued work with partner Dana Inc. on a key integration project, including providing upgraded battery packs and installing various other technologies.
- **February 2019:** Duane Hughes announced as Chief Executive Officer to further support company’s successful evolution into full scale production. Previously, Mr. Hughes had served as Workhorse President and Chief Operating Officer.
- **February 2019:** Robert Willison, PhD, engineering veteran and EV industry expert, appointed as Chief Operating Officer to lead company's transition into manufacturing.
- **December 2018:** Secured \$35 million financing from Marathon Asset Management.

### **Management Commentary**

“The second quarter represented another big step forward as we continue to work toward initial production and delivery of our N-GEN vehicle later this year,” said Workhorse CEO Duane Hughes. “With the funds raised from our recent financing, we now have a capital structure that is aligned with our large-scale manufacturing goals. Going forward, we remain on track in our testing and production timeline, which has us positioned to deliver on our existing backlog in the coming year. We are working

tirelessly to realize our long-held vision in which Workhorse is recognized as the leader in the last mile delivery segment.”

### **Second Quarter 2019 Financial Results**

Sales for the second quarter of 2019 were recorded at \$6,000, down from \$171,000 in the second quarter of 2018. The decrease in sales was primarily due to a decrease in volume of trucks delivered.

Selling, general and administrative expenses decreased 33% to \$2.0 million from \$3.0 million in the same period last year. The decrease in selling, general and administrative expenses was primarily due to decreased spending in areas such as marketing as well as decreases in other employee-related expenses.

Research and development expenses decreased 36% to \$1.2 million from \$1.9 million in the second quarter of 2018. The decrease in research and development expenses was due primarily to lower prototype expenses related to the US Postal Service (USPS) Next Generation Delivery Vehicle (NGDV) and SureFly™.

Total operating expenses decreased 34% to \$3.2 million from \$4.9 million in the same period last year. The decrease in total operating expenses was due to the lower SG&A and R&D spend previously mentioned.

As a result of the Company’s stock price increase, the net loss in the second quarter was \$36.9 million, compared with a net loss of \$6.9 million in the second quarter of 2018. The higher net loss was due to an increase in the fair value of the Company’s warrant liability driven by the Company’s stock price increase during the second quarter of 2019. This resulted in a non-cash expense of \$31.1 million. To be clear, excluding the non-cash warrant liability interest expense, the Q2 loss would have been \$5.8 million which is \$1.1 million less than in Q2 2018.

As of June 30, 2019, the company had cash, cash equivalents and short-term investments of \$23.5 million compared to \$1.5 million as of December 31, 2018.

### **Conference Call**

Workhorse management will hold a conference call today (August 6, 2019) at 10:00 a.m. Eastern time (7:00 a.m. Pacific time) to discuss these results.

Workhorse management will host the presentation, followed by a question and answer period.

U.S. dial-in: 877-407-8289

International dial-in: 201-689-8341

Please call the conference telephone number 5-10 minutes prior to the start time. An operator will register your name and organization. If you have any difficulty connecting with the conference call, please contact Gateway Investor Relations at 949-574-3860.
