

TEXAS INCENTIVES

Grant programs make electric trucks more affordable

Texas Fleets: Now is the Time to Electrify!

Texas is making it easier than ever to transition to zero-emission vehicles in 2025 with two incentive programs:

The **Texas Clean Fleet Program (TCFP)** helps large fleets replace 10 or more diesel trucks, covering up to 80% of the cost for zero-emission vehicles. Applications are open until March 21, 2025, or until funds run out.

The **Texas Environmental Mitigation Program (TxVEMP)** offers up to 100% funding for government fleets and 75% for private fleets to replace diesel vehicles with electric. Funding is also available for charging infrastructure, with applications accepted until August 31, 2025.

All **Workhorse Class 4-6 100% electric vehicles qualify**. Let our team help guide you through the process to maximize your funding.

Federal & State of Texas Incentives (as of Feb. 7, 2025)

45W Commercial Clean Vehicle Credit

Workhorse vehicles qualify for up to \$40,000 for each electric vehicle placed in service, including businesses, nonprofits, and government entities.

Publication 5724-B (Rev. 2-2023) (irs.gov). IRC Section 6417 for tax-exempt entities. Please consult your tax advisor.

Texas Clean Fleet Program (TCFP)

Texas fleets with 75 or more vehicles can take advantage of the Texas Clean Fleet Program (TCFP) to replace at least 10 diesel trucks with zero-emission or alternative fuel vehicles. Eligible applicants include businesses, government entities, and organizations operating in Texas, even if headquartered elsewhere.

- Up to 80% of incremental costs covered
- Available to fleets with 75+ vehicles registered in Texas
- Requires replacement of at least 10 diesel trucks
- New vehicles must be zero-emission or alternative fuel
- Deadline: March 21, 2025 (or until funds are exhausted)

<https://www.tceq.texas.gov/airquality/terp/tcf.html>

Texas Environmental Mitigation Program (TxVEMP)

Eligible public and private fleets can receive funding to replace diesel vehicles with all-electric models. Government entities may be reimbursed up to 100% of the incremental EV costs, while private fleets are eligible for up to 75%. The program also covers charging infrastructure, making it easier for fleets to transition to zero-emission vehicles. Applicants include businesses and organizations operating in Texas, even if headquartered outside the state.

- Open to public and private fleets replacing eligible diesel vehicles
- Government entities: Up to 100% of incremental EV costs covered
- Private fleets: Up to 75% of incremental EV costs covered
- Grants also cover charging infrastructure
- Deadline: Applications accepted on a first-come, first-served basis until August 31, 2025
